

## ***Our new home..***

The greenhouse effect was getting more and more stronger and planet Earth was under great danger as the sun was overheating and there were many possibilities for it to explode.

The only way to save our lives was to leave. My family and I got ready and soon we boarded a spacecraft to our destination Andromeda, the nearest galaxy. Before long our trip began. As we were travelling and everything seemed fine, we suddenly saw a meteorite coming over us at an extreme speed. All of us were panicked and couldn't do anything to stop it as we didn't have much time.

Fortunately, the crash wasn't intense and the meteorite hit the spacecraft deviously causing only small damages.

After some time, we finally reached Andromeda. There were some other people there too, just like us, afraid about what would happen in the future. Silence was dominating in a scenery that we had never outfaced. It was our new home!
